

WELLBIOING

We support well-being in your workplace and use biomaterials to build a greener future.

We create cosy,
multifunctional solutions
for healthy workspaces
that encourage relaxation
and focus.

VANK pods have been designed as spaces for meetings or individual work, and to act as “oases of peace” in open-space office environments. As a means to maintain the balance between personal space and teamwork.

Thanks to the castors, the mobile pods can be easily turned or moved away from any visual or acoustic distortion.

Employees can experience the relaxing and energizing effect of unique virtual reality experiences in a new **re: mind BOX**. This is the complete solution for the office to strengthen the health and well-being of your employees.

re: mind BOX

We use natural raw materials,
fine textures, and calming
colours that result in
harmony.

Our acoustic solutions are made from fibrous plants and through a biological process they absorb carbon dioxide from the atmosphere during their rapid growth. They are an alternative to plastics made from mineral oil and are renewable.

VANK's eco-transformation process was recognized by the Jury of the international Green Product Award 2022 or Iconic Design Awards 2022.

The biodegradable VANK_BIO_PANEL was also among the finalists of the German Sustainability Award Design 2022.

New **BIO_CUBE** with its genesis “office everywhere” is the basis for furnishing the future’s agile and eco-friendly workspace.

VANK_CUBE_BIO

The modular system built on a single element – a cube – allows easily changing the interior according to one's needs.

A single module looks like a box or stool, but a system of modules can be a bench, desk, counter, shelf, bookcase, or wall dividing the space.

VANK_CUBE_BIO

We feel responsible for our designs and respect natural resources – they motivate us to create.

We understand the need to be closer to nature and use natural surfaces. In workplaces, the touch and sight of wood lets calm down and think clearly. Organic materials undeniably convey feelings of comfort and energy. Wood is known to provide stress-relieving effects that could lower heart rate and blood pressure.

VANK_PEEL collection has been created out of concern for the natural resources of wood. The “reduce” step has been put into practice by using innovative wood-saving technology. The name PEEL emphasizes the fluidity of forms like peelings and reminds us of the possibilities of making use of what has so far been considered waste.

VANK_PEEL

The soft, creased, upholstered surfaces of the RING seats and high backrests improve the acoustic performance of contemporary office interiors, which has a great effect on the health and well-being of those present inside.

VANK_RING

VANK_RING

VANK_RING seats are filled with shredded foam sourced from post-industrial material. It is a way to reduce the amount of new foam purchased and used in the furniture industry. The collection is designed in line with the Cradle-to-Cradle principle. Each element of the entire piece can be easily detached and recycled when it's no longer in use.

VANK_RING

We're changing for you and for the planet with every step we make. You too can have a positive impact on the green transformation of our economy, choose wisely and join us.
